University of Yaoundé I
Physics · second-year undergraduate level
Studies discontinued

PROFILE

Self-taught Full-Stack Developer focused on web products, AI integration and automation. I learn by building: SaaS applications, web interfaces, backend services and intelligent features. Practical experience gained through independent products and professional collaborations.

EXPERIENCE

Founder & Principal Developer

WapiSend — independent SaaS project · 2026 – Present

- Designed and developed a WhatsApp marketing SaaS platform for campaigns, conversations and contact management.
- Worked on background processing, real-time updates, multi-user authentication and WhatsApp integrations.
- Integrated AI assistant and RAG capabilities; handled continuous improvement and troubleshooting.

Full-Stack Developer & Community Manager

TEDSAI Complex SARL — Yaoundé · Jan–Oct 2026

- Contributed to the company website and digital activities.
- Collaborated with the COA team on development, security, testing and software-quality tasks.
- Supported digital communications and community management.

Developer / Project Contributor

HAIR — Home of AI Revolutions · 2026

- Worked on a web presence focused on artificial intelligence, digital solutions and automation.

SELECTED PROJECTS

WapiSend — WhatsApp marketing SaaS: campaigns, contact management, background jobs, real-time features and AI/RAG capabilities.

Chronos — Mobile-first personal planning app focused on offline-first use, local storage, recurrence and reminders.

HAIR — Web presence focused on artificial intelligence, digital solutions and automation.

COA — Collaborated with a product team across a multi-app ecosystem, contributing to development, security, testing and quality.
